It takes a long time to get the link to download the items after clicking [Confirm] button

The process is taking time to generate URL (approximately 1 minute for 4GB package). Wait for a while to get the link.

The quantity of the extracted item does not match to the number purchased.

From August 27, 2017, the multiple files with the same contents ([Invariable Content] in the Service Download Instructions) are slimmed and simplified to a single file. You may copy the file up to the number of the quantity you purchased.

The download failed.

Retry the download before the download link expires. If there are several items to download, try downloading one or two at a time.

The downloaded file is not found.

Look for the default download folder of your browser.

In Windows, the default folder is C:¥Users¥<your user account>¥Downloads.

The unzipped file has a character corruption.

Use the zip archive utility that supports Shift_JIS character code.

The zip file cannot be extracted successfully; re-downloading does not help.

Use the zip archive utility that supports ZIP64 format.

If a file to be downloaded exceeds 2GB in its size, the file format becomes ZIP64.
